

ALL-BLACK CS6K-280 | 285MS-SD

Canadian Solar's ALL-BLACK SmartDC module features an innovative integration of Canadian Solar's new superpower module technology and SolarEdge's power optimization for grid-tied PV applications.

By replacing the traditional junction-box with a power optimizer, the SmartDC module optimizes power output at module-level. With this feature, the SmartDC module can eliminate module-level mismatch and decrease shading losses. Furthermore, the SmartDC module provides module-level monitoring that allows effective system management and minimizes operational costs.

KEY FEATURES

- 
Harvests up to 25% more energy from each module
 - Maximizes power from each individual module against potential mismatch risk
 - Decreases shading losses
- 
Easy installation, simple system design
 - Integrated smart solution, no need to add other accessories
 - Enhances the shading tolerance
- 
Reduces BoS Costs
 - Up to 11.25 kW ~ 12.75 kW per string allows for more modules to be based on different inverters
- 
Free module-level monitoring system
 - Full visibility of system performance with a free smartphone app
-
