ASSET MANAGEMENT SERVICES

Whether you're looking for a full-service solar asset management partner or need support in a few critical areas, Canadian Solar Asset Management Services (formerly Recurrent Energy) has the experience, expertise and capabilities to help navigate the complexities of a rapidly changing market.

PROCESSES AND CAPABILITIES

Canadian Solar Asset Management Services has a robust set of processes and capabilities in areas such as power market operations, operations management, operations transition and NERC compliance. Our suite of services for commercial, industrial and utility solar asset owners include:

- Revenue and cashflow optimization
- Risk and upside incentive strategies
- Contract management and compliance
- Financial administration (insurance, taxes, equity distributions)
- Power market operations (scheduling strategies, trend analysis, settlements, forecasting, imbalance risk)
- Hedges, merchant energy, complex PPA structures
- In-depth performance modeling, analysis and optimization
- O&M contractor management
- Warranty and spare parts management
- NERC and CIP compliance, regulatory management
- Incident management (safety, security, environmental, compliance, performance)
- Project management (operations transition, commissioning, relocations, decommissioning, repowering)
- ITC market recapture and secondary market strategies

OUR DEDICATED TEAM has managed more than 1.7 GW of commercial and utility solar power plants worldwide, representing hundreds of millions of dollars in annual energy revenues. We understand the owner's perspective and treat your assets as our own.
